Confirmation

I hereby declare that the indications provided herein are true and accurate and I instruct to execute the following change in strategy. I further confirm that I have read and understood the Regulations and General Terms and Conditions of the Foundation and that I accept their contents. **The currently valid Foundation Regulations and General Terms and Conditions are published on the lealta.ch homepage under the heading «Foundation Regulations/General Terms and Conditions».**

**Data exchange/
Authority to pro-
vide information**

I hereby release the Foundation and its representatives from all confidentiality obligations under Swiss law or any other applicable law which may prohibit the disclosure of such information (e.g. Article 62 FADP) and agree that the Foundation may share certain personal data of mine in accordance with the Privacy Policy. In particular, the data will be disclosed to provide the Foundation's products and services requested by me, but also for marketing purposes. I hereby authorise the Foundation and agree that it may also disclose my personal data to foreign recipients (e-mail communication, data centers) as part of the above-mentioned data disclosures. **The currently valid Privacy Policy is published on the lealta.ch home-page under the heading «Privacy Policy».**

**Confirmation
concerning risk
check/
investments**

I confirm that I have answered all questions truthfully and that the risk profile I have selected corresponds to my capacity for risk. My investment decisions were taken relying on my investment knowledge, investment objectives and investment horizon. I was not promised any returns on investments. Moreover, I am aware that the chosen investment horizon may be affected by events outside my control (e.g. termination of employment, disability, death, return to Switzerland). I am further aware that investments in securities and other assets can produce losses (e.g. on prices, interest rates and currencies) and that I alone carry that risk.

No advise

By signing, I confirm that no personal (legal, tax or other) advice has been provided to me. I am familiar with the functioning, customary practice, structures and risks of the investment business.

7. How long is your investment horizon with regard to the planned strategy?

- | | |
|--|----|
| a) <input type="checkbox"/> 0-3 years → Your investment horizon generally corresponds to a low-risk investment strategy. | 0 |
| b) <input type="checkbox"/> 3-5 years | 2 |
| c) <input type="checkbox"/> 6-10 years | 4 |
| d) <input type="checkbox"/> 10 - 20 years | 10 |
| e) <input type="checkbox"/> over 20 years | 15 |

Capacity for risk

Questions 8 and 9 serve to establish your capacity for risk taking into account your investment horizon.

8. As the following examples show, the higher the expected returns, the higher the risk; this therefore presupposes a higher capacity for risk. These examples are hypothetical and disregard the current market situation. Which of the following statements best applies?

- | | |
|--|----|
| a) <input type="checkbox"/> You are not willing to accept fluctuations in asset values.
→ Your risk tolerance generally advises a low-risk investment strategy. | 0 |
| b) <input type="checkbox"/> You seek stable returns with limited fluctuations in asset value (e.g. investments may fluctuate between minus 5% and plus 5% per year). | 2 |
| c) <input type="checkbox"/> You are willing to accept a certain degree of annual fluctuation in asset value in order to achieve higher long-term returns (e.g. investments may fluctuate between minus 10% and plus 10% per year). | 4 |
| d) <input type="checkbox"/> You are willing to accept annual fluctuations in asset value in order to achieve higher long-term returns (e.g. investments may fluctuate between minus 15% and plus 15% per year). | 7 |
| e) <input type="checkbox"/> You are willing to accept high yearly fluctuations in asset value in order to maximise long-term returns (e.g. investments may fluctuate between minus 20% and plus 20% per year). | 10 |

9. Assume that you have opted for an investment involving a certain risk. After initial gains, your investment starts making a loss. How would you react assuming that your personal investment environment and time horizon under questions 1 to 7 have not significantly changed?

- | | |
|---|---|
| a) <input type="checkbox"/> I would probably switch to a less risky investment. | 2 |
| b) <input type="checkbox"/> I would probably wait and only change after a drastic loss. | 4 |
| c) <input type="checkbox"/> I would probably hold on to my investment because I can basically accept temporary losses in price. | 6 |

Total points

Risk check evaluation

Risk profile	Risk Level	Corresponding investment strategy
	Risk Level 1 <input type="checkbox"/> 0 – 20 points	Low risk: Your risk profile corresponds to a strategy geared to the long-term preservation of capital, without any significant fluctuation in asset values. The investment focus is therefore on a fixed-interest, value-preserving investment solution denominated in Swiss francs. Risk Notice: You should be aware that no strategy is entirely risk-free. Therefore, a value-preserving strategy can produce a negative performance.
	Risk Level 2 <input type="checkbox"/> 21 – 33 points	Conservative: Your risk profile corresponds to a conservative strategy targeting regular income, without entirely neglecting chances for slight price and/or exchange rate gains. Investments are weighted in favour of fixed-rate instruments such as bonds. The combination of a small equities allocation and a limited foreign currency content aims to build up assets in the long term while limiting fluctuations in asset value. Your appetite for risk allows an equity allocation of up to 25% or the low-risk investment strategy.
	Risk Level 3 <input type="checkbox"/> 34 – 46 points	Balanced: Your risk profile corresponds to a balanced strategy, targeting regular income and a higher long-term return. Asset allocation is balanced between fixed-term investments, equities and foreign currency. This is designed to ensure stable returns while taking advantage of opportunities for price and/or foreign exchange gains. The aim is long-term asset appreciation while accepting fluctuations in asset value. Your appetite for risk allows an equity allocation of up to 40%, or the low-risk investment strategy.
	Risk Level 4 <input type="checkbox"/> 47 – 60 points	Dynamic: The dynamic risk profile corresponds to a strategy targeting higher price and/or foreign exchange gains rather than regular income. Asset allocation is weighted in favour of assets with a higher foreign currency share. The aim is high long-term asset appreciation, accepting fluctuations in asset values. Your appetite for risk allows an equity allocation of up to 60%, or the low-risk investment strategy. With your risk profile, the extended investment opportunities under Article 50(4) BVV2/OPP2 and the Foundation's Investment Regulations are available to you.
	Risk Level 5 <input type="checkbox"/> 61 – 74 points	Growth: Your risk profile corresponds to a strategy where higher price and/or foreign exchange gains are more heavily weighted than regular income. Asset allocation favours assets (equities) with a high foreign currency share. The aim is high long-term asset appreciation hazarding fluctuation in asset values. Your appetite for risk allows an equity allocation of up to 80% or the low-risk investment strategy. The extended investment opportunities under Article 50(4) BVV2/OPP2 and the Foundation's Investment Regulations are available to you.
	Risk Level 6 <input type="checkbox"/> 75 – 94 points	Capital gains: Your risk profile corresponds to a strategy where higher price and/or foreign exchange gains are significantly more heavily weighted than regular income. Asset allocation favours assets (equities) with a very high share of foreign currencies. The aim is high long-term asset appreciation, accepting significant fluctuations in asset values. Your appetite for risk allows an equity allocation up to a max. of 85% or the low-risk investment strategy. The extended investment opportunities under Article 50(4) BVV2/OPP2 and the Foundation's Investment Regulations are available to you.

Choice of investment strategy

Based on my risk check and risk profile and taking into account the applicable Foundation Regulations, I hereby instruct the Foundation to apply the following investment strategy:

Investment strategy	Low risk	Conservative	Balanced	Dynamic	Growth	Capital gains
Risk Level	1	2	3	4	5	6
Chosen strategy	<input type="checkbox"/>					

Confirmation

I hereby confirm that I have answered all the questions truthfully, added up the points, and understood the risk profile and investment strategy corresponding to the total points. The investment strategy I have chosen

my risk profile not my risk profile

Reason for the deviation if the investment strategy is higher than the risk profile.
